

## Chatswood High School 'Bring Your Own Device' Program 2020 - Device Suggestions

This is a list of devices that have been compiled based on the Device Purchase Portals on the Chatswood High School Website created in conjunction with HP and JB Hi-Fi Education. These are recommended devices with varying specifications with the expectation to last 3-4 years at a sufficient level of performance.

**We recommend parents use this as a starting point. Both these purchase portals have the aim of simplify your choices and purchasing processes.**

However, parents should conduct their own research and select a device that best meets their child's needs and budget.

*Purchasing a device via the Portal does not confer additional service or support obligations related to device performance on the School.*

**Things to be aware of in cheaper models that do not meet CHS BYOD Specification or recommendations:**

\* Small hard drive in laptops/hybrids: Anything **less than 128GB** of storage will limit the software that can be installed on the device.

\* Small amount of RAM: If the device will be used in subjects that **require the Adobe Creative Cloud software (eg Photoshop)**, this software in most cases has a minimum RAM requirement of 8GB.

\* As shown in the table, these devices have a 2-3 year on-site warranty and also the option or inclusion of Accidental Damage Protection \*ADP (some with an excess or zero dollar excess).

**Please research the choice of additional protection.**

**For all technical specifications, it is important to consider the long-term use.** It is likely your device will be used for most of the student's time at CHS so will need to meet future demands.
