

# Chatswood Public School and Chatswood High School

Project update

March 2022

## Investing in our schools

The NSW Government is investing \$7.9 billion over the next four years, continuing its program to deliver 215 new and upgraded schools to support communities across NSW. This is the largest investment in public education infrastructure in the history of NSW.

We are upgrading Chatswood Public School and Chatswood High School with new and improved facilities to support the local community.

## Progress summary

### *Chatswood High School*

Hazardous materials removal in Buildings A and B has been completed. Asbestos containing materials were removed in accordance with the Department of Education's Asbestos Management Plan and SafeWork NSW regulations. Clearance certificates have been received prior to the start of structural demolition works.

### *Chatswood Public School*

Building P1 has been topped out. This means the last concrete slab has been poured and construction of the steel roof structure will start soon.

Concrete has been poured for the vertical structure of Level 2 of Building P2.

## Next steps

### *Chatswood High School*

The installation of the vertical structure for Building S Level 1 is progressing.

Hazardous materials removal in Buildings I and F is ongoing and will be completed before structural demolition works begin. Structural demolition of Buildings A, B, I and F will start in late March 2022 and will be undertaken progressively through April 2022. If additional asbestos containing material is found during ongoing demolition works, it will be remediated in accordance with the unexpected finds procedure contained within the Asbestos Management Plan.

Once demolition works have finished, bulk earthworks and structural piling and footings for Building T and Q will start.

### *Chatswood Public School*

Ongoing construction of Buildings P1 and P2, internal services installation and landscaping. Works on the Building P1 façade are underway and the suspended concrete slab for Level 2 of Building P2 will be poured in late March 2022, weather permitting.

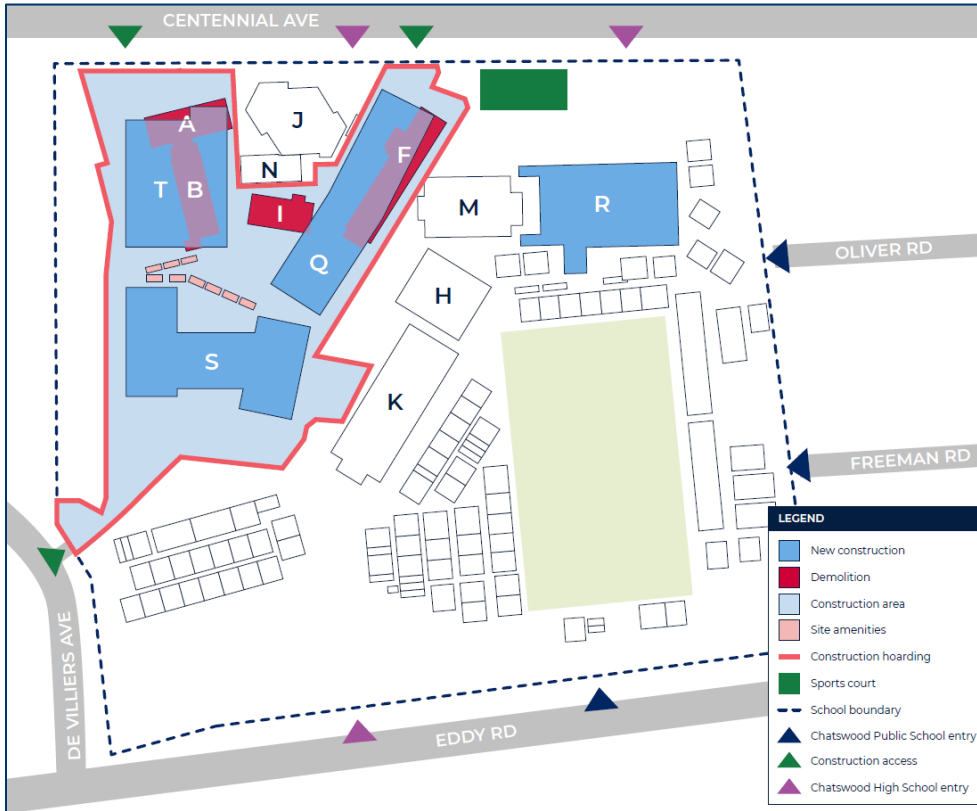

Stormwater connection works are currently being planned in Jenkins Street. Subject to council approval, the works will connect the new buildings under construction at Chatswood Public School with the main Sydney Water stormwater line. Further information will be provided prior to the works starting.
