

## SENIOR STUDIES GUIDE 2023-2024

*Guide for Course Selection for  
Years 11 and 12*

The Senior High School provides you with opportunities to take different pathways to your preferred future.

This booklet is designed to help you choose the appropriate pathway and the most suitable subjects for study in Years 11 and 12. The subject choice decisions you make now will give you the opportunity to plan for your future.

The HSC is an internationally recognised credential which provides a strong foundation for post school life. Whether you pursue tertiary qualifications, vocational training or move directly into the workforce, the HSC qualification will equip you with the necessary skills and knowledge to make a meaningful contribution to your chosen field.

To ensure that your decisions are appropriate, you are advised to:

1. carefully read the information provided in this booklet
2. investigate the requirements for your possible career interests and university entrance by obtaining information from the Careers Adviser
3. check with your teachers about your ability with relation to the specific courses/subjects you may be considering, and the workload that will be expected of you. Read your Semester One reports carefully as current performance is the best indicator of future performance. Be realistic about your selections.
4. take responsibility for your own learning. You have control of your future.

All the best for the next two years.

David Osland  
**Principal**  
June 2022

## STUDYING FOR THE HIGHER SCHOOL CERTIFICATE

The Higher School Certificate (HSC) recognises 13 years of education. In the interests of greater career choices and increased opportunities, at university and TAFE NSW, it offers you a full range of study areas matching individual abilities, interests and goals.

The HSC is the highest educational award you can gain in New South Wales schools. It is an internationally recognised credential that provides a strong foundation for the future, whether you wish to pursue tertiary qualifications, vocational training or employment.

### ELIGIBILITY FOR THE HSC

To be eligible for the award of the Higher School Certificate, students must:

- a. have gained the Record of School Achievement or such other qualifications as the NESA considers satisfactory;
- b. have attended a government school, an accredited non-government school, a school outside New South Wales recognised by NESA or a college of TAFE;
- c. have completed *HSC: All My Own Work* (or its equivalent);
- d. have satisfactorily completed courses that comprise the pattern of study required by NESA for the award of the Higher School Certificate; and
- e. sit for and make a serious attempt at the requisite Higher School Certificate examinations.

### THE HSC CURRICULUM

As you begin considering your course preference list it is important that you familiarise yourself with the names used to describe courses on offer as this can potentially have a considerable impact on your eligibility for an Australian Tertiary Admission Rank (ATAR) which is a prerequisite for university entry.

A subject is the general name given to an area of study, for example English, and a subject may offer one or more courses (Advanced English, Standard English, etc.).

English, Mathematics, Science, History, Music and some Languages are subjects which offer more than one course. The other subjects each offer one 2 unit course.

### TYPES OF COURSES

#### Board Developed Courses

These are courses for which NESA develops a syllabus setting out the aims, objectives, outcomes, structure and content. Most Board Developed HSC courses, including the VET framework courses, may contribute to the calculation of the ATAR.

#### Board Developed Life Skills Courses

Life Skills courses are Board Developed courses that provide an alternative HSC for students with special learning needs. They are not examined externally and do not contribute to an ATAR.

#### Board Endorsed HSC Courses

These courses count towards the HSC and are listed on your Record of Achievement. However, they do not count towards the calculation of the ATAR.

Board Endorsed Courses are divided into two categories:

- School-designed Courses – these are developed by individual schools in response to local interest or need and endorsed by the NESA.

- Content Endorsed Courses – these fall into two categories: general CECs and TAFE-delivered CECs. They have syllabuses endorsed by NESA cater for areas of special interest not covered in the Board Developed Courses.

There is no external examination for any Content Endorsed Course or School Designed Course, but all Board Endorsed Courses count towards the HSC and appear on your Record of Student Achievement (RoSA).

### Board Developed Vocational Education and Training (VET) Courses

There are Board Developed and/or Board Endorsed courses in VET. These VET courses are offered as part of the HSC. They teach skills that are relevant to future study and employment. They allow for both HSC qualifications and Australian Qualifications Framework (AQF) accreditation.

The AQF qualifications are recognised by industry and employers throughout Australia and give students advanced standing in related study at TAFE NSW and private registered providers. You receive documents that report the competencies you have achieved and an AQF Certificate or Statement of Attainment.

VET courses are classified as CATEGORY B courses and only ONE of the VET frameworks will be accepted when calculating the ATAR. Students must study the 240 hour course and undertake the optional written examination to have the course contribute to the ATAR calculation.

Board Developed (Category B) VET courses will be offered at Chatswood High School for the HSC in the following industry frameworks:

- Financial Services
- Entertainment Industry

### COURSES SUMMARY TABLE

| Course Type    | Board Developed    | Life Skills                    | Content Endorsed | VET                       |
|----------------|--------------------|--------------------------------|------------------|---------------------------|
| <i>Example</i> | <i>Mathematics</i> | <i>Life Skills - Geography</i> | <i>Numeracy</i>  | <i>Financial Services</i> |
| HSC eligible   | ✓                  | ✓                              | ✓                | ✓                         |
| ATAR eligible  | ✓                  | ✗                              | ✗                | ✓ One ONLY                |

If you are interested in other VET / TAFE or additional courses, see [External Course Information](#)

### UNITS OF STUDY

Most courses offered for the HSC have a value of two units (2 unit) in Year 11 and two units in Year 12. Each unit requires approximately 60 hours of study per year. Each one unit has a mark value of 50. A two unit course over two years requires approximately 240 hours of study. Most courses have a value of two units with a mark value of 100.

Some exceptions are some:

- Content Endorsed Courses
- Extension Courses.

Extension study at Chatswood High School is available in English, Mathematics, Science, History and Music. Extension courses allow students to study at a more intensive level in diverse but specific areas. Extension courses have an additional 1 unit (50 marks) value.

English Extension 1 and Mathematics Extension 1 begin in Year 11 and continue into Year 12. Students wishing to further their study in those subjects may choose to study the Extension 2 course in Year 12. Extension 2 requires students to work beyond Extension 1 standard.

Extension History, Extension Music and Extension Science are courses that begin in Year 12.

### [RETURN TO CONTENTS](#)

Year 11 Senior Studies Guide 2023-2024

*Disclaimer: All efforts were made to ensure the information contained within this book were correct at the time of publication. At all times CHS will be guided by NESA requirements. For any and all questions, please seek advice from a Deputy Principal.*

## MANDATORY STUDY REQUIREMENTS

English is the only compulsory HSC subject.

To be eligible for the award of the HSC you must satisfactorily complete at least:

- 12 units in your Year 11 study pattern (Year 11 = 3 terms)
- 10 units in your Year 12 pattern. (Year 12 = 4 terms starting Term 4 Year 11)

Both study patterns must include:

- At least two units of a Board Developed course in English
- At least six units of Board Developed Courses
- At least three courses of 2 unit value or greater
- At least four subjects

No more than six units of Science can be studied in Year 11 and no more than seven units of Science can be studied in Year 12.

## HSC PATHWAYS

Most students follow a two year program of study in Years 11 and 12 leading to the award of the HSC. NESA also provides access for those people who wish to combine their studies with employment or other responsibilities, such as family care.

The Pathways provisions listed allow flexibility in obtaining the HSC.

## ACCUMULATION OF THE HSC

Students may accumulate an HSC over a five year period. The five year period will commence in the first year a student completes an HSC course.

Students who are accumulating courses may access a Student eRecord showing each calendar year of study. The cumulative Student eRecord will record all Year 11 and Year 12 courses satisfactorily completed, including repeat attempts. The mark of the final attempt in a particular course is the mark used for the calculation of the ATAR. By the end of the period of accumulation, all Year 11 and Year 12 pattern of study requirements need to be met. In subjects that include extension courses, you may accumulate by presenting the 2 unit course in one year and the extension course in a later year.

## REPEATING A COURSE

You may repeat one or more HSC courses, but you must do so within the five year accumulation period. In the calculation of the Australian Tertiary Admissions Rank (ATAR), the most recent mark in a course will be used.

## ACCELERATION

Students may undertake Year 11 or Year 12 courses in advance of their usual cohort. Acceleration gives more able students the opportunity to progress through their study requirements at a faster rate than usual by completing the course content in a shorter time and accumulating results. Decisions about acceleration will be made by the Principal.

## PART TIME TRAINEESHIPS AND APPRENTICESHIPS

In some cases HSC Studies can be undertaken at the same time as a part time traineeship or apprenticeship. Both combine paid work and training that leads to a recognised Australian Qualifications (AQF) VET qualification. These can only be undertaken in very special areas of VET. See the Careers Adviser.

## AUSTRALIAN TERTIARY ADMISSION RANK (ATAR)

The Australian Tertiary Admission Rank (ATAR) is a number between 0 and 99.95 with increments of 0.05. It provides a measure of a student's overall academic achievement in the NSW HSC in relation to that of other students and assists institutions to rank applicants for tertiary selection. It is calculated by the institutions and released by UAC. The ATAR is a rank not a mark.

Further details on the ATAR can be obtained from the Universities Admission Centre (UAC) [www.uac.edu.au](http://www.uac.edu.au)

To be eligible for an ATAR you must satisfactorily complete at least 10 units of Board Developed Courses including at least 2 units of English.

The ATAR is calculated using an aggregate of scaled marks (average of examination and assessment marks) in 10 units of Board Developed courses comprising either:

- the best 2 units of English; plus 8 units from Category A courses.
- OR
- 8 units of Category A courses (including English) and 2 units of Category B courses (i.e. one Category B subject). Students must complete the HSC exam for the Category B course.

## SELECTION RANK ADJUSTMENTS

While the ATAR may be the best single predictor of academic success, institutions acknowledge that there are other selection criteria that are relevant to certain courses. Institutions may base their selection of students on an interview, audition, portfolio, questionnaire or test. Sometimes these selection criteria are used on their own and sometimes in conjunction with the ATAR. The selection rank for a course (previously known as a cut-off) does not necessarily represent the minimum ATAR required for entry into the course. Selection ranks include adjustment factors (previously known as bonus points), and students with ATARs below the selection rank may get offers.

## ASSESSMENT AND REPORTING

The HSC is based on a standards referenced framework. Student performance is assessed and reported against standards of achievement established for each course.

School-based assessment tasks constitute 50% of the HSC mark. The other 50% comes from the HSC examination.

The HSC mark for 2 unit courses is reported on a scale of 0 - 100. A mark of 50 represents the minimum standard expected. There are 5 performance bands above 50 that correspond to different levels of achievement in knowledge, skills and understanding. Band 6 corresponds to the highest level of achievement, indicating a range of marks between 90 and 100.

HSC results for VET courses are delivered at two levels. Assessment is competency based, with students receiving a competency log. An external exam is optional and will represent 100% of their mark in this course for the HSC.

Complete school-based assessment tasks for each Board Developed HSC Course, other than VET courses, is required. For VET courses a competency based assessment program will apply.

School-based assessment tasks are designed to measure performance in a wider range of objectives than may be tested in an examination. Assessment tasks may include tests, written or oral assignments, practical activities, fieldwork and projects. The assessment requirements for each Board Developed Course are set out in each syllabus.

On satisfactory completion of the HSC students receive the following:

- The HSC Testamur
- The HSC Record of Achievement (RoSA to be downloaded from the NESA website). This includes the HSC examination mark, assessment mark, HSC mark and Performance Band for each HSC course satisfactorily completed (except VET courses)
- AQF Certificate in VET

Year 11 Senior Studies Guide 2023-2024

*Disclaimer: All efforts were made to ensure the information contained within this book were correct at the time of publication. At all times CHS will be guided by NESA requirements. For any and all questions, please seek advice from a Deputy Principal.*

## ALL MY OWN WORK

To be eligible for an HSC all students must complete the *HSC: All My Own Work* program or its equivalent. The program is designed to help HSC students to follow the principles and practices of good scholarship. This includes understanding and valuing ethical practices when locating and using information as part of their HSC studies.

If students are concerned about their abilities to meet the ethical and good scholarship requirements of a Stage 6 course then they should discuss this with a Year Adviser.

See also: [All My Own Work](#)

## EXTERNAL STUDY

Some students will undertake patterns of study involving an external institution.

External Institutions Include:

- [TAFE](#)
- [Saturday School of Community Languages](#)
- [NSW School of Languages](#)

Additional information on specific courses is available at the [External Course Information](#) section of this guide.

To ensure students undertake a successful pattern of study, Chatswood High School requires students who take courses in these institutions, ensure that they have 12 units of study at Chatswood High School until the end of Term 1, after which time they may apply to their Deputy Principal to terminate a course to reach their minimum unit requirement (12 units). Students will need to supply proof of successful progress in their external course before permission will be given to terminate any course.

Students entering Year 11 who wish to undertake external study must complete the [External Studies Application Form](#) and bring this with them to the interview that takes place with the Subject Selection panel. If initial approval to take an external course is given at the interview, students must complete the forms appropriate to each institution.

## SUBJECT SELECTION PROCESS

Students will be making their subject selections online via the program *Edval Webchoice*. A link with a unique code and information on how to do this will be sent to their school email address. It is a requirement of this program that students use their Department of Education email address (firstname.surname@education.nsw.gov.au)

Subject selection preferences can be changed as often as the student likes until *WebChoice* closes.

1. Ensure your Department of Education email is working and check it regularly for the invitation email with the link and your unique web-code
2. Go to <https://my.edval.education/login> and enter your unique code
3. Select the subjects you want, in order of PREFERENCE (this means the subject you list at the top is the one you want the most)
4. Click submit

## SUBJECTS THAT WILL RUN

Once the preference portal has closed, the data will be downloaded and reviewed by the Principal and Executive who will determine which subjects run based on student choice and staff availability. Students who are not able to have a full complement of courses from their identified preferences will be asked to discuss their options with the Deputy Principal and the Timetable Team and reselect their preferences.

# CHATSWOOD HIGH SCHOOL - YEAR 11 COURSE CHOICES

## SUMMARY TABLE

|                         | YEAR 11 AND YEAR 12 COURSES (alphabetical)   | UNIT VALUE | Available  |       | CATEGOR Y |

Year 11 Senior Studies Guide 2023-2024

Disclaimer: All efforts were made to ensure the information contained within this book were correct at the time of publication. At all times CHS will be guided by NESA requirements. For any and all questions, please seek advice from a Deputy Principal.

## COURSE SELECTION ADVICE CHECKLIST

Students and parents are encouraged to read the following points carefully:

- ☐ Students are most likely to succeed when they choose courses which align with their interests and abilities. Choosing a course that does not match your interests and abilities will not usually equate to high achievement in that course.
- ☐ Is there a good balance to the subjects selected? Are you ok across your junior subjects or do you perform better in classes that involve more (or less) writing?
  - Do your subjects complement one another? Do the skills or concepts covered in one course relate to content in another course?
- ☐ Friends can be a good sounding board for your thoughts about your pattern of study. However, picking a course because a friend is doing it is not a guarantee that you will be in the same class, nor does it have a direct bearing on your academic success.
- ☐ Be aware of any potential issues with your specific course combination, including eligibility for ATAR or the consequences if you want/need to drop a course moving into Year 12.
  - Not every student is seeking an ATAR – that is OK
  - You can only count ONE Category B course towards an ATAR
- ☐ Consider any additional course requirements listed. These requirements often take notable time away from other courses and students will need to be well-planned, motivated and organised to balance these requirements successfully
  - Does the course have a major work? Most teachers advise against undertaking two/three major work courses without careful consideration.
  - Does the course involve work placement or is it an external course that may take you away from your timetabled lessons? You are expected to complete any and all outstanding work during these times.
- ☐ Consider potential requirements for any areas of tertiary study you may be interested in. The Careers Adviser is an excellent source of advice and support on tertiary prerequisites.
  - If there are no prerequisites, then choosing courses that allow you to maximise your ATAR will give you as many options as possible!
- ☐ Ask, Ask, ASK! Everyone wants you to make the best choice for you and your education. There are a range of places you can get more specific information to support your preference listing:
  - Information sessions provided by the Head Teachers
  - The Parent Information Evening
  - Your teachers, Head Teachers, teachers of that subject.
  - Ask for copies of the textbook or similar information sources
  - Look up the NESA syllabus online
  - Students currently doing the course
  - Careers Adviser for advice on careers, tertiary institution requirements, TAFE NSW courses and VET courses.
  - Deputy Principals regarding curriculum requirements and subject combinations.
  - University Entry Requirements Year 10 Booklet produced by University Admissions Centre (UAC) at <http://www.uac.edu.au>

| <p><b>Course Description:</b></p> <p>Aboriginal Studies develops students’ knowledge and understanding about the historical and contemporary experiences of Aboriginal peoples, whilst acknowledging the contribution of Aboriginal cultures and communities to Australian society. The course covers a broad range of contemporary social and political issues and involves a comparative study of an international indigenous community. The core concept throughout the course is for students to develop their understanding of Aboriginal Heritage and Identity. Students complete a Major Project incorporating community consultation and local perspective. Through this course Aboriginal students are provided with an opportunity for cultural affirmation and positive educational experiences while non-Aboriginal students are able to ‘learn together’ with Aboriginal peoples and communities. All students take an active role in the process of reconciliation, an integral part of Australia’s society today.</p> <p>The course allows for flexible delivery and structure to enhance students by developing their analytical skills and the ability to pursue independent inquiry and project development in a medium of their choice. This further pursues student’s ability to foster their own autonomy and direct elements of their own learning.</p> |  |                 |               |

### Employment / University Opportunities:

The writing and analysis skills developed in this course are particularly useful to students intending to study Law, Arts, Archaeology, Education, Business management/marketing or any media related courses.

Aboriginal Studies Stage 6 also provides a valuable foundation for a range of courses at University and other tertiary institutions. All courses at University require a high degree of communication skills and Aboriginal Studies provides an ideal foundation for this.

Other career links include: journalism, Psychology, Sociology, Human Resources, public relations, politics, foreign affairs officer, conservator, anthropologist, research officer, secondary teacher, museum curator, library work or any field where employers want applicants with a sound general knowledge who can think critically and flexibly and communicate effectively.

| <b>Course Description:</b><br><br>In this course, students are introduced to the ancient world through the study of ancient societies, personalities and different periods of Ancient History. The study of Ancient History has a strong focus on using archaeological and written sources to gain a deep understanding of the ancient past.<br><br>Students have the opportunity to explore their own areas of interest through the completion of a Historical Investigation and are able to use a wide range of media to present their findings. The new HSC encourages a variety of assessments to allow all students to follow their own interests in this course.<br><br>This course is particularly valuable to students who wish to develop their skills in analysis and writing. It also develops skills which will help them in many subjects (e.g. English, Legal Studies, Economics) in the HSC and at University. |   |                 |               |                        |                        |                      |                                       |                   |                                  |                       |                              |                  |   |                     |            |                                |  |

**STUDENTS ALSO HAVE THE OPPORTUNITY TO STUDY EXTENSION HISTORY IN YEAR 12 IF THEY STUDY EITHER MODERN OR ANCIENT HISTORY**

**Employment / University Opportunities:**

The writing and analysis skills developed in this course are particularly useful to students intending to study Law, Arts, Archaeology, Education, Business management/marketing or any media related courses.

Ancient History Stage 6 also provides a valuable foundation for a range of courses at University and other tertiary institutions. All courses at University require a high degree of communication skills and Ancient History provides an ideal foundation for this.

Other career links include: journalism, Psychology, Sociology, Human Resources, public relations, politics, foreign affairs officer, conservator, anthropologist, research officer, secondary teacher, museum curator, library work or any field where employers want applicants with a sound general knowledge who can think critically and flexibly and communicate effectively.

| BIOLOGY   |   | Unit Value   | ATAR Category |
|---|---|--|---------------|
| Board Developed Course  |   | 2  | A             |
| <b>Prerequisites:</b><br>Satisfactory completion of Stage 5 Science   | <b>Exclusions:</b><br>Maximum of 6 units of Science |  |               |
| <b>Cost:</b> \$35 + additional excursion expenses   |   |  |               |
| <b>Course Description:</b><br><p>The Biology course explores the diversity of life from a molecular to a biological systems level. The course examines the interactions between living things and the environments in which they live. It explores the application of biology and its significance in finding solutions to health and sustainability issues in a changing world.</p> <p>Biology uses Working Scientifically processes to develop scientific investigative skills. It focuses on developing problem-solving and critical thinking skills in order to understand and support the natural environment. When Working Scientifically, students are provided with opportunities to design and conduct biological investigations both individually and collaboratively.</p> <p>Biology also involves the analysis of qualitative and quantitative data, students are encouraged to solve problems and apply knowledge of biological interactions that relate to a variety of fields. The Biology course builds on the knowledge and skills of the study of living things found in the Science Stage 5 course. The course maintains a practical emphasis in the delivery of the course content and engages with the technologies that assist in investigating current and future biological applications.</p> |   |  |               |
| <b>Main Topics Covered:</b>   |   |  |               |
| <u>Year 11 Course</u> <ul style="list-style-type: none"><li>- Cells as the Basis of Life</li><li>- Organisation of Living Things</li><li>- Biological Diversity</li><li>- Ecosystem Dynamics</li></ul>  |   | <u>Year 12 Course:</u> <ul style="list-style-type: none"><li>- Heredity</li><li>- Genetic Change</li><li>- Infectious Disease</li><li>- Non-infectious Disease and Disorders</li></ul> |               |
| <b>Particular Course Requirements:</b> <p>Scientific investigations include both practical investigations and secondary-sourced investigations. Practical investigations are an essential part of the Year 11 course and 12 course and must occupy a minimum of 70 hours of course time, including time allocated to practical investigations in depth studies (15 hours).</p> <p>Practical investigations include:</p> <ul style="list-style-type: none"><li>● undertaking laboratory experiments, including the use of appropriate digital technologies</li><li>● fieldwork.</li></ul> <p>Secondary-sourced investigations include:</p> <ul style="list-style-type: none"><li>● locating and accessing a wide range of secondary data and/or information</li><li>● using and reorganising secondary data and/or information.</li></ul> <p>One fieldwork exercise <b>must</b> be completed in Year 11.</p> <p>It is strongly recommended that students who select Biology have good literacy skills and are considering Advanced English.</p>  |   |  |               |
| <b>External Assessment:</b> <p>HSC Examination – 3 hour examination</p>   |   |  |               |

### Employment / University Opportunities:

Biology, Medicine, Veterinary Science, Nursing, Environmental Science, National Parks and Wildlife Services

| Board Developed Course  |   | 2                                     | A             |   |   |
| Prerequisites: Nil  |   | Exclusions: Nil                       |               |   |   |
| Cost Year 11: Nil   |   | Cost Year 12: \$37 HSC Case Study Fee |               |   |   |
| <b>Course Description:</b><br><br>Business Studies is a subject that provides students with insight, knowledge and experience into the functioning of business from both a management perspective as well as a consideration of the role business plays in wider society.<br><br>Course content is contextualised with a focus on current case studies: Why did the Dick Smith retail chain go into administration? What drives the growth of Zara? What makes Australia’s most profitable company? How does Qantas maintain its market share in an increasingly competitive global tourism market? Students who have a good general knowledge of local, national and international businesses will be able to apply the ideas and terms used in Business Studies to great effect.<br><br>Business Studies concepts also relate to content covered in Economics, Legal Studies, and Financial Services and so is a useful complement to these subjects. The focus on written work also complements work in English and History.<br><br>The literacy and analytical demands of this course are slightly less than other Social Science courses; however, the breadth of the course is considerable. It is well suited to students who will work hard in class, ask questions and engage in regular revision to ensure they are up to date with coursework. Students who utilise the news to stay informed will have an advantage in this course.<br><br>For more detail on the course, please review the <a href="#">NSW Business Studies Stage 6 Syllabus</a> . If you have any questions, see any Geography or Commerce teacher. |   |                                       |               |   |   |

### Employment / University Opportunities:

An interest and enthusiasm in Business Studies will contribute to maximising an ATAR result and will also provide the basis for continuing the study of Business, Marketing, Commerce, Economics or Law at university. Furthermore, students wishing to enter the business world directly or run their own business will find the HSC component very useful in the practise of business management, including the accounting and legal frameworks.

| <b>Cost:</b> \$35 (+ additional excursion expenses)   |   |            |               |                       |                        |                                      |                                  |  |                       |                      |                     |                        |                           |
| <b>Recommendation:</b> Students wanting to study Chemistry require a deep understanding of Mathematics. Chemistry is only recommended for those students who have undertaken <b>5.3 Mathematics in Stage 5</b> .  |   |            |               |                       |                        |                                      |                                  |  |                       |                      |                     |                        |                           |
| <b>Course Description:</b><br><p>The Chemistry course explores the structure, composition and reactions of and between all elements, compounds and mixtures that exist in the Universe. The discovery and synthesis of new compounds, the monitoring of elements and compounds in the environment, and an understanding of industrial processes and their applications to life processes are central to human progress and our ability to develop future industries and sustainability.</p> <p>The course further develops an understanding of Chemistry through the application of Working Scientifically skills. It focuses on the exploration of models, understanding of theories and laws, and examination of the interconnectedness between seemingly dissimilar phenomena.</p> <p>Chemistry involves using differing scales, specialised representations, explanations, predictions and creativity, especially in the development and pursuit of new materials. It requires students to use their imagination to visualise the dynamic, minuscule world of atoms in order to gain a better understanding of how chemicals interact.</p> <p>The Chemistry course builds on students’ knowledge and skills developed in the Science Stage 5 course and increases their understanding of Chemistry as a foundation for undertaking investigations in a wide range of Science, Technology, Engineering and Mathematics (STEM) related fields. A knowledge and understanding of chemistry is often the unifying link between interdisciplinary studies.</p> |   |            |               |                       |                        |                                      |                                  |  |                       |                      |                     |                        |                           |

### Employment / University Opportunities:

Drama students combine creative talent with practical aspects of self-promotion and arts management. This mix of disciplines is a good preparation for the world of artistic performance.

Employment opportunities related to this course include: actor, community arts worker, drama therapist, arts administrator, broadcast presenter, teacher, theatre stage manager.

Furthermore, the skills you gain while studying drama are valued by all types of employers, for example, confidence, presentation, teamwork and collaboration, time management and organisational skills, self-awareness, self-discipline, communication skills, stamina, as well as the ability to cope with criticism and learn from it.

| <b>Course Description:</b><br><p>This course explores the Earth’s renewable and non-renewable resources and also environmental issues. An understanding of the Earth’s resources and the ability to live sustainably on the planet is a central purpose of the study of Earth and Environmental Science.</p> <p>The course uses the Working Scientifically skills to develop knowledge through the application of those skills. Students engage with inquiry questions to explore knowledge of the Earth. They also undertake practical and secondary-sourced investigations to acquire a deeper understanding of the Earth’s features and naturally occurring phenomena and cycles. Fieldwork is an integral part of these investigation processes.</p> <p>Earth and Environmental Science involves the analysis, processing and evaluation of qualitative and quantitative data in order to formulate explanations and solve problems. In conjunction with knowledge and understanding, communication skills are essential in forming evidence-based conclusions or arguments.</p> <p>The Earth and Environmental Science course builds on the knowledge and skills of Earth and Space gained in the Science Stage 5 course. The course maintains a practical emphasis in the delivery of the course content, and engages with technologies that assist in developing earth and environmental science applications.</p> |   |            |               |                       |                        |                     |                     |                   |           |                          |                   |                 |                       |

| - Human Impacts   | - Resource Management                               |            |               |                       |                        |                     |                     |                   |           |                          |                   |                 |                       |
| <b>Particular Course Requirements:</b><br><p>Scientific investigations include both practical investigations and secondary-sourced investigations. Practical investigations are an essential part of the Year 11 course and 12 course and must occupy a minimum of 70 hours of course time, including time allocated to practical investigations in depth studies.(15 hours)</p> <p>Practical investigations include:</p> <ul style="list-style-type: none"><li>● undertaking laboratory experiments, including the use of appropriate digital technologies</li><li>● fieldwork.</li></ul> <p>Secondary-sourced investigations include:</p> <ul style="list-style-type: none"><li>● locating and accessing a wide range of secondary data and/or information</li><li>● using and reorganising secondary data and/or information.</li></ul> <p>One fieldwork exercise must be completed in both Year 11 and Year 12.</p> <p>A solid grounding in Stage 5 Science is recommended as well as strong literacy skills.</p>   |   |            |               |                       |                        |                     |                     |                   |           |                          |                   |                 |                       |
| <b>External Assessment:</b><br>HSC Examination – 3 hour examination   |   |            |               |                       |                        |                     |                     |                   |           |                          |                   |                 |                       |

### Employment / University Opportunities:

Environmental Science is an expanding career field, with opportunities in both government (EPA, CSIRO, Land & Water Conservation, Agriculture, National Parks & Wildlife Service) and private sectors (mining, construction, development and tourism).

| <b>Course Description:</b><br><br>In Economics, students learn to appreciate how financial flows, market operations, government and industry decisions shape the world around us. The course will look at economic theory through to the practical application to current issues in the Australian economy as well as economic problems in the global economy.<br><br>A high level of contemporary economic appreciation is essential for success in this course and students seeking top results will need to investigate and interrogate current media and government reports.<br><br>Economic concepts also relate to content covered in Business Studies, Legal Studies, and Geography and so is a useful complement to these subjects. The focus on written work also complements work in English and History.<br><br>The literacy and analytical demands of this course are high compared to other Social Sciences courses. It is well suited to students who will work hard in class, ask questions and engage in regular revision to ensure they are up to date with coursework. Students who have a good ability to integrate data and statistics into written analysis will have an advantage in this course.<br><br>For more detailed information, students are encouraged to review the <a href="#">NESA Economics Stage 6 Syllabus</a> or discuss the course with any Commerce teacher. |  |                 |               |  |  |

### Employment / University Opportunities:

Interest and enthusiasm in Economics will contribute to maximising an ATAR result and will also provide the basis for continuing the study of Economics, Business, Government Policy, Commerce, or Law at university. Furthermore, students wishing to work in financial regulation, global politics or diplomacy will find the grounding in economic theory essential to tertiary success.

| ENGINEERING STUDIES  |  | Unit Value      | ATAR Category |
|--|--|-----------------|---------------|
| Board Developed Course   |  | 2               | A             |
| Prerequisites: Nil   |  | Exclusions: Nil |               |
| Cost: \$20 per year  |  |                 |               |
| <b>Course Description:</b><br><br>Both Year 11 and HSC courses offer student’ knowledge, understanding and skills in aspects of engineering that include communication, engineering mechanics/hydraulics, engineering materials, historical/societal influences, engineering electricity/electronics, and the scope of the profession. Students study engineering by investigating a range of applications and fields of engineering.  |  |                 |               |
| <b>Main Topics Covered:</b><br><br><div><div><u>Year 11 Course:</u><br/>Students undertake the study and develop an engineering report for each of 4 modules:<br/>Three application modules (based on engineered products).<br/>At least one product is studied from each of the following categories: engineering fundamentals; engineered products; and braking systems<br/>One focus module relating to the field of Bio Medical Engineering</div><div><u>Year 12 Course:</u><br/>Students undertake the study and develop an engineering report for each of 4 modules:<br/>Two application modules (based on engineered products). At least one product is studied from each of the following categories: civil structures; personal and public transport.<br/>Two focus modules relating to the fields of Aeronautical Engineering and Telecommunications Engineering</div></div> |  |                 |               |
| <b>Particular Course Requirements:</b> Engineering Report<br><br><u>Year 11 Course</u><br>Students are required to produce a component of an engineering report in Engineering application module 3, Braking systems, and then a complete engineering report in Engineering focus module 4, Biomedical engineering.<br><br><u>HSC Course</u><br>Students are required to produce one engineering report from either of the two engineering application modules, and one from either of the two engineering focus modules.<br>One engineering report from the Year 11 course and one engineering report from the HSC course must be the result of collaborative work, reflecting the importance of teamwork for successful engineering projects.  |  |                 |               |
| <b>External Assessment:</b><br>HSC- 3 hour written examination.  |  |                 |               |

### Employment / University Opportunities:

Students undertaking Engineering Studies Stage 6 will have the opportunity to follow a number of pathways. These include tertiary study, vocational education and training, and the world of work. For those following a pathway of further study, the insight and experience associated with a study of engineering will be beneficial in their presumed knowledge of the area of study.

| ENGLISH: ADVANCED  | Unit Value   | ATAR Category |
|--|--|---------------|
| Board Developed Course   | 2  | A             |
| <b>Prerequisites:</b><br>Students should have a <b>minimum of 80% and be ranked in the top 75 of the Stage 5 Year 10 English course</b> and will need to have <b>previously demonstrated the ability</b> , necessary skills and application to cope with the demands of this course through their exam results, classwork and rank. The English Faculty actively supports and guides each student into the course that is most appropriate for their ability, literacy skills and application.   | <b>Exclusions:</b> English Standard; English EAL/D; English Studies. |               |
| <b>Cost:</b> Nil   |  |               |
| <b>Course Description:</b><br>In the English Advanced course, students continue to explore opportunities to investigate complex ideas in challenging texts, to evaluate, emulate and employ powerful, creative and sophisticated ways to use language to make meaning, and to find enjoyment in literature.<br>Students refine their understanding of the dynamic relationship between language, texts and meaning. They do this through critical study and through the skilful and creative use of language forms and features, and of structures of texts composed for different purposes in a range of contexts. Through study of the course modules students continue to develop their skills to question, reconsider and refine meaning through language, and to reflect on their own processes of responding, composing and learning.<br>Across the English Advanced Stage 6 course students are required to study: <ul style="list-style-type: none"><li>• a range of types of texts inclusive of prose fiction, drama, poetry, nonfiction, film, media and digital texts</li><li>• texts which are widely regarded as quality literature, including a range of literary texts written about intercultural experiences and the peoples and cultures of Asia</li><li>• a range of Australian texts, including texts by Aboriginal and/or Torres Strait Islander authors and those that give insights into diverse experiences of Aboriginal and/or Torres Strait Islander Peoples</li><li>• texts with a wide range of cultural, social and gender perspectives.</li></ul> |  |               |
| <b>Main Topics Covered:</b><br><div><div><u>Year 11 Course:</u><br/>The course has three Modules:<br/>Common module: Reading to Write:<br/>Transition to Senior English.<br/>Module A: Narratives that Shape our World;<br/>Module B: Critical Study of Literature.<br/>In addition, students will produce a writing portfolio under the guidance of their class teacher.</div><div><u>Year 12 Course:</u><br/>The course has four Modules:<br/>Common module: Texts and Human Experiences.<br/>Module A: Textual Conversations;<br/>Module B: Critical Study of Literature;<br/>Module C: The Craft of Writing. To be completed in stages with the other Modules.<br/>All four Modules are mandatory.</div></div>   |  |               |

| ENGLISH: EXTENSION COURSE 1 (AND 2)  | Unit Value  | ATAR Category  |  |   |
|--|---|--|--|---|
| Board Developed Course   | 1 (or the possibility of 2 in Year 12)  | A  |  |   |
| <b>Prerequisites:</b> For a student to be eligible to study the Extension One English course, they will need to be enrolled in the Advanced English course and should be ranked in the top 40 of the Stage 5 Year 10 English course. In Year 12, for a student to be eligible to study the Extension Two English course, they will need to be enrolled in the Advanced English course and the Extension One English course. They will also need to have demonstrated a strong aptitude for writing in a type of text, researching and be highly organised. Students will be invited to elect Extension 2 English.  |   | <b>Exclusions:</b> English Standard; English EAL/D; English Studies. |  |   |
| <b>Cost:</b> Nil   |   |  |  |   |
| <b>Course Description:</b> <p>The English Extension course provides students who undertake Advanced English and are accomplished in their use of English with the opportunity to extend their use of language and self-expression in creative and critical ways. The course is designed for students with an interest in literature and a desire to pursue specialised study of English. Through engaging with increasingly complex concepts through a broad range of literature, from a range of contexts, students refine their understanding and appreciation of the cultural roles and the significance of texts and about the way that literature shapes and reflects the global world.</p> <p>The English Extension 2 course enables students who are accomplished in their use of English with the opportunity to craft language and refine their personal voice in critical and creative ways. They can master skills in the composition process to create a substantial and original Major Work that extends the knowledge, understanding and skills developed throughout Stage 6 English courses. Through the creative process they pursue areas of interest independently, develop deep knowledge and manipulate language in their own extended compositions. The course develops independent and collaborative learning skills and higher-order critical thinking that are essential at tertiary levels of study and in the workplace.</p> |   |  |  |   |
| <b>Main Topics Covered:</b> <table><tr><td><u>Year 11 Course:</u><p>In the English Extension 1 Year 11 course, students explore the ways in which aspects and concerns of texts from the past have been carried forward, borrowed from and/or appropriated into more recent culture. | <u>English Extension 2:</u> <p>In the English Extension 2 Year 12 course, students develop a sustained composition, and document their reflection on this process.</p> <p>The course requires students to undertake a composition process in order to complete a Major Work and Reflection Statement.</p>  |   |  |  |   |

**Particular Course Requirements:**

Year 11 English Extension 1 students are required to:

- examine a key text from the past and its manifestations in one or more recent cultures
- explore, analyse and critically evaluate different examples of such texts in a range of contexts and media
- undertake a related research project.

Year 12 English Extension 1 students are required to study:

- at least THREE prescribed texts for the elective study which must include two print texts (as outlined in the English Stage 6 Prescriptions: Modules, Electives and Texts Higher School Certificate 2019–2023 document, elected by the English Faculty)
- at least TWO related texts.

Year 12 English Extension 2 students are required to:

complete a Major Work which involves students undertaking extensive independent investigation involving a range of complex texts during the composition process and document this in their Major Work Journal and Reflection Statement.

**External Assessment:**

HSC – 1 written examination.

Extension 2 Major Work and Reflection Statement is submitted in August and externally assessed.

| ENGLISH: ENGLISH STUDIES  | Unit Value | (ATAR option) Category  |
|---|------------|---|
| Board Developed Course  | 2          | B   |
| <b>Course Entry Guidelines:</b><br>Students considering this course should be advised that English Studies is a Stage 6 Board Developed Course (Category B). Students are able to sit for an optional HSC examination and will be reported on a common scale with the English Standard and English Advanced courses. Students choosing not to sit for the English Studies HSC examination will still be eligible for the HSC if they have satisfactorily completed courses that comprise the pattern of study required by NESA.<br>To be eligible for an ATAR, students studying the English Studies course must complete the optional HSC examination and include a further 8 units of Category A courses in their pattern of study.<br>The English Faculty actively supports and guides each student into the course that is most appropriate for their ability, literacy skills and application. |            | <b>Exclusions:</b> English Advanced; English Standard; English EAL/D; Extension English |
| <b>Cost:</b> Nil  |            |   |
| <b>Course Description:</b><br><br>This course is designed to meet the specific needs of students who wish to refine their skills and knowledge in English and consolidate their literacy skills. The English Studies course provides students with opportunities to become competent, confident and engaged communicators and to study and enjoy a breadth and variety of texts. Students explore the ideas, values, language forms, features and structures of texts in a range of personal, social, cultural, academic, community and workplace contexts. Through responding to and composing texts students strengthen their ability to access and comprehend information, assess its reliability, and synthesise the knowledge gained from a range of sources for a variety of purposes.  |            |   |
| <b>Main Topics Covered:</b><br><br><div style="display: flex; justify-content: space-between;"> <div style="width: 45%;"> <u>Year 11 Course:</u><br/>           Students study 3-4 Modules:<br/>           Mandatory module: Achieving through English: English in education, work and community;<br/>           Students study 2–4 additional syllabus modules (selected based on their needs and interests).<br/>           Students may also study an optional teacher-developed module.         </div> <div style="width: 45%;"> <u>Year 12 Course:</u><br/>           Students study 3-4 Modules:<br/>           Common module: <i>Texts and Human Experiences</i><br/>           Students study 2–4 additional syllabus modules (selected based on their needs and interests).<br/>           Students may also study an optional teacher-developed module.         </div> </div>             |            |   |
| <b>Particular Course Requirements:</b><br>In Year 11, students study the mandatory module, Achieving through English: English in education, work and community to develop an understanding of, and practical competence in, the use of language that allows access to opportunities in schooling, training and employment.<br>Students study two to four additional syllabus modules (selected based on their needs and interests).<br>Students may also study an optional teacher-developed Module.<br>In Year 12, the Common Content consists of one module <i>Texts and Human Experiences</i> which is also common to the HSC Standard and the HSC Advanced courses where students study ONE text from the prescribed text list and one related text. Students analyse and explore texts and apply skills in synthesis.  |            |   |

| <b>Course Description:</b> <p>This course investigates the knowledge and activities relating to meeting food needs and wants across domestic, commercial and industrial settings. Food issues have a constant relevance to life. This concept underpins the subject and is reflected throughout the Preliminary and HSC courses.</p> <p>Food Technology provides students with a broad knowledge of food, including the factors that influence food availability and selection, the role of nutrition in contributing to the health of individuals and society, and the structure of the Australian food industry.</p> <p>Contemporary nutrition issues are raised and investigated, enabling students to make informed responses to changes in the production to consumption continuum and exert an influence on future developments in the food industry as educated citizens and in their future careers.</p> <p>Opportunities exist for students to develop skills relating to food that are relevant and transferable to other settings. Such skills include the ability to research, analyse and communicate. With the knowledge, skills and attitudes gained through the study of this course, students will have the potential to contribute positively to their own future and to the social, economic and ecological future of Australia.</p> <p>This is a <b>practical</b> “hands on” course for all students. Students will experiment with and prepare food each week as well as design, implement and evaluate solutions to a range of food situations.</p> |   |                 |               |   |   |

### Employment Opportunities:

The study of Food Technology Stage 6 provides students with knowledge, understanding and skills that form a valuable foundation for a range of courses at university and other tertiary institutions. In addition, the study of Food Technology Stage 6 assists students to prepare for employment and full and active participation as citizens. In particular, there are opportunities for students to gain recognition in vocational education and training.

### Employment / University Opportunities:

The study of French provides students with opportunities for continued learning and for future employment and experience, both domestically and internationally, in areas such as public relations, commerce, hospitality, education, marketing, international relations, media and tourism.

French has been, by tradition, the language of diplomacy. It is an official language in a large number of international organisations including the United Nations Organisation, the European Union, the South Pacific Commission, the Organisation for African Unity and the Olympic Games. This language features strongly in international conferences and is used by many overseas aid organisations.

For more than 200 years, Australia has had strong connections with France. In today's world, a strong relationship continues to exist through trade and investment, communication technologies, education, scientific and technological research and cultural exchange.

| <b>Cost:</b> \$62 for combined textbook / workbook  |  |                                      |               |  |  |
| <b>Course Description:</b><br><br>In the French Continuers Year 11 and HSC courses, students will develop the linguistic and intercultural knowledge and understanding, as well as the speaking, listening, reading and writing skills to communicate in French. The student’s skills in, and knowledge of French will be developed through tasks associated with a range of texts and text types, which reflect a variety of themes and associated topics.<br><br>Tasks include conversation, responding to an aural stimulus, responding to a variety of written material, writing for a variety of purposes, studying French culture through texts. Topics studied through three interdependent perspectives: the Individual, the French-speaking communities and the Changing World, provide contexts in which students develop their communication skills in French and their knowledge and understanding of language and culture. |  |                                      |               |  |  |

| <p><b>Course Description:</b></p> <p>Questioning the world around you is the cornerstone of geographical inquiry and underpins success in HSC Geography. Students are encouraged to explore contemporary issues in human geography through research and practical field work. By encouraging hands on learning, students in Geography don't revise the textbook – they remember their experiences!</p> <p>The HSC Geography course is a more contemporary and less rigid course than what many experienced in junior Geography, although some key areas, including ecosystem management and urban development are developed throughout Years 11 and 12. Students who have enjoyed junior Science and/or Geography will enjoy the HSC Geography course.</p> <p>Geography course content also relates to content covered in Business Studies, Economics, Society &amp; Culture, Legal Studies, Biology, Chemistry and Earth &amp; Environmental Science and so it is a useful complement to these subjects.</p> <p>While extended response writing is required in the HSC, the demands of this course are lower and, in turn, it is a good option for students who favour maths and sciences as an additional course to make up their unit total. 20 marks in the HSC examination are for the application of geographic skills (eg: gradient, bearing). A comparatively low state cohort means that students who perform highly, are at a considerable advantage.</p> <p>The literacy and analytical demands of this course are relatively lower compared to other Social Sciences courses. It is well suited to students who learn best through experience, use a glossary to learn new terms and have an interest in how the world is changing.</p> |                                |                 |               |                        |                        |                            |                      |                     |                |                            |                                |

| Cost: \$80 course fee per year  |  |            |               |  |  |
| <b>Course Description:</b><br><p>This is the central senior course in Computing Studies and covers a broad range of topics. Information systems and the role they play in society have increased in significance in recent years. The raw ingredients – information, information technology and participants – combine to form information processes within information systems. The area of information systems has provided major jobs growth for both women and men in recent years. Moreover, fields which have not traditionally been associated with computers – but in which processing information is a vital function – are emerging as exciting new areas of employment. These include music, the arts, science and technology as well as new and fast-growing industries that use multimedia such as game design and movies.</p> <p>The Information Processes and Technology Stage 6 course teaches students about information-based systems. It covers the processes of collecting, organising, analysing, storing and retrieving, processing, transmitting and receiving, and displaying, as well as the technologies that support them. With this background, students will be well placed to adapt to new technologies as they emerge. The course analyses information systems and their development from a management perspective as well as providing practical experience in the development of systems by students themselves.</p> <p>Students should take this course if they have an interest in technology and its application to computer based information systems. Social and ethical issues are also a focus.</p> <p>NOTE: If you are unsure about which computing subject you would like to do, but would like to develop well-rounded computer literacy, this is the subject to choose.</p> |  |            |               |  |  |

| LEGAL STUDIES  |  | Unit Value      | ATAR Category |  |  |
|--|--|-----------------|---------------|--|--|
| Board Developed Course   |  | 2               | A             |  |  |
| Prerequisites: Nil   |  | Exclusions: Nil |               |  |  |
| Cost: Nil (excursions as they arise)   |  |                 |               |  |  |
| <b>Course Description:</b> <p>Legal Studies is a subject that fosters an appreciation of the role law plays in society in Australia and around the world. While advantageous, students are not required to have studied Commerce in Years 9-10.</p> <p>By reviewing laws, cases and media articles students are required to examine how our society is regulated with a view to analysing what else could be done to make things better. Students also examine key institutions of the law in Australia – parliament, the courts and other quasi-legal organisations; as well as the international framework for cooperation between nation states and the concept of human rights.</p> <p>Legal Studies concepts also relate to content covered in Modern History, Economics and Business Studies; and so is a useful complement to these subjects.</p> <p>Students are required to understand a legal issue from a range of perspectives and to formulate their own perspective on the best legal response. The course, in turn, requires students to quickly build factual knowledge and then apply a framework to evaluate. Top students are required to integrate significant and varied legal details to their responses and so students who utilise the news to stay informed will have an advantage in this course.</p> <p>For more detailed information, students are encouraged to review the <a href="#">NESA Legal Studies Syllabus</a> or discuss the course with Ms Bohdan or Mr Morris.</p> |  |                 |               |  |  |

### **Employment / University Opportunities:**

An interest and enthusiasm in Legal Studies will contribute to maximising an ATAR result and will also provide the basis for continuing the study of Business, Marketing, Commerce, Economics or Law at university.

The skills required in legal analysis are highly transferable and adaptable to all tertiary study or for those seeking employment immediately after Year 12.

| Cost: Nil  |   |                 |               |  |   |
| <b>Course Description:</b><br><br>In this course, students are introduced to the history of the modern world through the study of a broad range of major events that have helped to shape our world today. Students of Modern History look at a range of case studies and events from 1789 to the present day. The course examines modern history through a wide range of media including documentary, film, web and print sources.<br>Students have the opportunity to explore their own areas of interest through the completion of a Historical Investigation and are able to use a wide range of media to present their findings. The new HSC encourages a variety of assessments to allow all students to follow their own interests in this course.<br><br>This course is particularly valuable to students who wish to develop their skills in writing, which is essential to nearly all HSC and University courses. It also develops critical thinking and analysis skills, which will complement and assist them in many subjects (e.g. English, Legal Studies and Economics) in the HSC. The study of Modern History gives an understanding of major events of the twentieth century, which provides an essential background for many other subjects studied at school and university. |   |                 |               |  |   |

**STUDENTS ALSO HAVE THE OPPORTUNITY TO STUDY EXTENSION HISTORY IN YEAR 12 IF THEY STUDY EITHER MODERN OR ANCIENT HISTORY**

**Employment / University Opportunities:**

The writing and analysis skills developed in this course are particularly useful to students intending to study Law, Arts, Communications, International Studies, Media, Education, business management/marketing or any field where employers want applicants with a sound general knowledge who can think critically and flexibly and communicate effectively.

Modern History Stage 6 also provides a valuable foundation for a range of courses at University and other tertiary institutions and past students often relate how their study of Modern History prepared them well for their studies at University.

| MUSIC 1  |  | Unit Value      | ATAR Category |
| Board Developed Course   |  | 2               | A             |
| Prerequisites: Nil   |  | Exclusions: Nil |               |
| Cost: \$30<br>It is recommended that Music students attend private lessons for their chosen Instrument/Voice.  |  |                 |               |
| <b>Course Description:</b><br>Students in Music 1 range from those with beginner instrumental and/or vocal skills to those with highly developed performance skills in a variety of musical styles including contemporary/popular and classical music. Many of the students have highly developed aural skills that have been nurtured through performance by imitation, and skills in improvisation have often been developed through the same process.<br><br>Music 1 assumes no prior knowledge of musical notation beyond the basic introduction in the Years 7–10 Mandatory course. It recognises that students who have had no further involvement in Music beyond their introduction in the Mandatory course will need to revisit elementary musical skills and understanding.  |  |                 |               |
| <b>Main Topics Covered:</b><br>The course provides students with opportunities to engage in a range of musical styles, including contemporary popular music, and for many, it will serve as a pathway for further training and employment in the music industry or in contemporary music fields.<br>In Music 1, students will study:<br>the concepts of music; through the learning experiences of performance, composition, musicology and aural within the context of a range of styles, periods and genres.<br><div><div><u>Year 11 Course:</u><br/>Students will study at least THREE topics from a broad list of music styles, periods and genres including: Rock; Music for Radio, Film, Television and Multimedia; Jazz; Medieval Music, Popular Music.</div><div><u>Year 12 Course:</u><br/>Students will study at least THREE topics from the syllabus.<br/>The topics must be:<br/>Either THREE topics which are different from those studied in the Year 11 course<br/>or<br/>TWO topics which are different from those studied in the Year 11 course and ONE topic from the Year 11 course which shows greater depth of understanding, explores new repertoire and includes a comparative study.</div></div> |  |                 |               |
| Particular Course Requirements: nil  |  |                 |               |
| <b>Assessment:</b><br>Core Assessment covers all areas of this course. Performance; Composition; Aural and Musicology and are weighted equally.<br>HSC Assessment Tasks are set in each core component 55% and also in 3 Electives 45% chosen from Performance, Composition and Musicology.  |  |                 |               |

### Employment / University Opportunities:

Students can progress to some tertiary institutions on an audition basis. They may enter the music industry as performers. They may continue Composition or progress into Audio/Sound field. Some of the music careers available include: Performers and writers, Recording, Record industry, Industry touring, Music education, Radio and television, Symphony orchestra, Music health, and Instrument work and development

| MUSIC 2  |  | Unit Value | ATAR Category |   |  |
|--|--|------------|---------------|---|--|
| Board Developed Course   |  | 2          | A             |   |  |
| <b>Prerequisites:</b> This demanding course requires students to have a broad music background such as Elective Music in Stage Five or a study of an instrument supported by musicianship. Students are expected to be familiar with standard form of music notation.  | <b>Exclusions:</b> Nil   |            |               |   |  |
| <b>Cost:</b> \$30<br>It is recommended that Music students attend private lessons on their chosen Instrument/Voice and may require professional accompaniment for performance examinations.  |  |            |               |   |  |
| <b>Course Description:</b><br><br>Students develop skills in performance, composition, aural and musicology through the study of the concepts of music. The Mandatory Topic in the Year 11 Course is the study of Music 1600-1900. In the Year 12 course students study Music composed in the last 25 years with a focus on Australian Music. In both years students research an additional topic.   |  |            |               |   |  |

| <b>Prerequisites:</b> Satisfactory completion of Stage 5 Science course.   |                                 | <b>Exclusions: Maximum of 6 units of Science</b> |               |                        |                        |              |                      |            |                    |                            |                       |                             |                                 |
| <b>Cost:</b> \$35 (plus additional excursion expenses)   |                                 |  |               |                        |                        |              |                      |            |                    |                            |                       |                             |                                 |
| <b>Recommendation:</b> successful study of Physics requires a strong understanding of Mathematics, therefore it is recommended that students be proficient at 5.3 Mathematics from Stage 5 (selecting Advanced Mathematics or above in Year 11)  |                                 |  |               |                        |                        |              |                      |            |                    |                            |                       |                             |                                 |
| <b>Course Description:</b><br><br>The Physics course involves the study of matter and its motion through space and time, along with related concepts that include energy and force. Physics deals with the study of phenomena on scales of space and time from nuclear particles and their interactions up to the size and age of the Universe. This allows students to better understand the physical world and how it works, appreciate the uniqueness of the Universe, and participate in navigating and influencing the future.<br>The problem-solving nature of Physics further develops students’ Working Scientifically skills by focusing on the exploration of models and the analysis of theories and laws, which promotes an understanding of the connectedness of seemingly dissimilar phenomena.<br>Students who study Physics are encouraged to use observations to develop quantitative models of real world problems and derive relationships between variables. They are required to engage in solving equations based on these models, make predictions, and analyse the interconnectedness of physical entities. The Physics course builds on students’ knowledge and skills developed in the Science Stage 5 course and help them develop a greater understanding of physics as a foundation for undertaking post-school studies in a wide range of Science, Technology, Engineering and Mathematics (STEM) fields. A knowledge and understanding of Physics often provides the unifying link between interdisciplinary studies. |                                 |  |               |                        |                        |              |                      |            |                    |                            |                       |                             |                                 |

| SCIENCE EXTENSION  |   | Unit Value | ATAR Category |
|--|---|------------|---------------|
| Board Developed Course   |   | 1          | A             |
| <b>Prerequisites:</b> Prerequisite courses for entry into Science Extension Year 12 are one of, or a combination (up to 6 units of study) of, Biology, Chemistry, Earth and Environmental Science, Investigating Science or Physics in Year 11.  | <b>Co-requisite</b> courses for Science Extension Year 12 are one of, or a combination (up to 7 units of study) of, Biology, Chemistry, Earth and Environmental Science, Investigating Science or Physics in Year 12. |            |               |
| <b>Cost:</b> NIL   |   |            |               |
| <b>Recommendation:</b> Students who achieve a rank in the top 10% of a specific subject cohort will be invited to join this class either at the end of Term 3 or the beginning of Term 4 (after Year 11 results have been finalised).  |   |            |               |
| <b>Course Description:</b><br><p>The Science Extension Stage 6 Syllabus focuses on the nature, development and processes of science. The course requires students to engage with complex concepts and theories and to critically evaluate new ideas, discoveries and contemporary scientific research. Students are challenged to examine a scientific research question influenced by their study of one or more of the scientific disciplines. In doing this, students extend their knowledge of the discipline(s), conduct further analysis and authentic scientific investigations, and uniquely for this course, produce a detailed scientific research report that reflects the standards generally required for publication in a scientific journal. Students interrogate and refine their ideas of and about science through analysing historic and cultural observations and significant scientific research within the relevant ethical frameworks and philosophical arguments of the time. Through designing and conducting their own scientific research, initially using small datasets, students deepen and build upon their understanding of analysing and interpreting data. They are provided with opportunities to refine and extend their skills of Working Scientifically by applying these interrelated processes to contemporary authentic scientific research reflecting the skills used by practising research scientists. Students gather, examine, model and critically assess evidence that is informed by analysis of primary and secondary-sourced data and examining this data in relation to relevant publicly available data sets. Science Extension is designed for students with an interest in scientific research. The course lays a foundation for students planning to pursue further study in Science, Technology, Engineering or Mathematics (STEM) based courses offered at the tertiary level, and to engage in new and emerging industries.</p> |   |            |               |
| <b>Main Topics Covered:</b><br><u>Year 12 Course:</u> <ul style="list-style-type: none"><li>- Foundations of Scientific Theory</li><li>- The Scientific Research Proposal</li><li>- The Data, Evidence and Decisions</li><li>- The Scientific Research Report</li></ul>  |   |            |               |
| <b>Particular Course Requirements:</b> Students must propose and develop a research question, formulate a hypothesis and develop evidence-based responses in the form of a Scientific Research Report, which is supported by a Scientific Research Portfolio.<br>The Scientific Research Report and Portfolio produced in this course may be an extension of, but must not overlap with or significantly duplicate, any depth study attempted in the Year 11 or Year 12 Biology, Chemistry, Earth and Environmental Science, Investigating Science or Physics courses.   |   |            |               |
| <b>External Assessment:</b><br>HSC Examination – 2 hour examination + 5 minutes reading time   |   |            |               |

### Employment / University Opportunities:

Any research role in the various fields of Science: Biology, Chemistry, Earth and Environmental Science or Physics

|  |   |                 |               |   |   |

| <b>Course Description:</b><br><br>Society and Culture is a specialist course for students who are interested in exploring the interactions between individuals, the cultures in which we operate and the forces shaping communities over time. If you are interested in how your identity has been shaped and how collective experience forms social identity and customs then you will find this course interesting.<br><br>More like a university course, Society and Culture borrows heavily from sociology, psychology, anthropology and political science. It is a course requirement that students develop, apply, analyse and evaluate their own research. Using examples and issues to provide context, the course examines aspects of societies and cultures including: power, authority, gender and technology. It requires and seeks to develop high levels of cultural literacy and an ability to examine source bias and ethical research.<br><br>Unlike most other HSC courses, there are few content parallels. However, students who have a breadth of cultural experiences both in Australia and abroad tend to find it easier to adapt course concepts to their own experience sets. Students of history and social sciences will find the style of writing and analysis complementary.<br><br>Students should familiarise themselves with the Personal Interest Project, a major work project which constitutes 40% of the external mark for the HSC. |   |                 |               |   |   |

### Employment / University Opportunities:

The intellectual and research requirements of Society and Culture are far more like a University Course than an HSC one. In turn, it is excellent preparation for the demands of tertiary study in all forms, but is especially useful for studies within: The Arts, Global Studies, Urban Planning, Government & Policy, International Relations, Law, Business and Psychology.

| SOFTWARE DESIGN AND DEVELOPMENT   |                 | Unit Value   | ATAR Category |

| <b>Course Description:</b><br><br>Students should choose this subject if they like problem solving and are interested in programming computers, authoring multimedia with scripting, and computer science. Students will be introduced to a range of programming languages and styles and will master at least one in depth. Software Design and Development refers to the creativity, knowledge, values and communication skills required to develop computer programs. The subject provides students with a systematic approach to problem-solving, an opportunity to be creative, excellent career prospects and interesting content. Software development is a distinctive field within the computing discipline. Those who will do further study in this field are at an advantage if they understand software programming.<br><br>There are many different approaches that can be taken in developing software. An understanding of these and the situations in which they are applied is essential in software development as is an understanding of how hardware and software are interrelated.<br><br>In order to develop solutions that meet the needs of those who will use them, communication, personal and team skills are required by developers. Together, these form the basis for the course. |                 |  |               |

| <p><b>Course Description:</b></p> <p>Textiles and Design is a predominately practical course. The theoretical component supports the students understanding of the textile medium and textiles in society. Students explore their creative abilities and skills in designing, manipulating, experimenting and selecting textiles for various end uses. Textiles and Design develops a body of knowledge, skills and values that contribute to the overall education of students and which can provide opportunities for small business and leisure activities useful throughout life. It develops student creativity and project management skills that promote self-esteem and satisfaction. Students develop an understanding that textiles in industry, small business and in leisure activities has an emphasis on project work and students emulate this through the designing, planning and manufacturing of a Major Textiles Project.</p> <p>Students select one focus area through which they develop a project, which includes supporting documentation and textile item/s:</p> <ul style="list-style-type: none"><li>• apparel</li><li>• furnishings</li><li>• costume</li><li>• textile arts</li><li>• non-apparel.</li></ul> |  |                 |               |                 |                 |                |                |  |  |  |  |  |                                |

### Employment Opportunities:

The study of Textiles and Design Stage 6 provides students with knowledge, understanding and skills that form a valuable foundation for a range of courses at university and other tertiary institutions. In addition, the study of Textiles and Design Stage 6 assists students to prepare for employment and full and active participation as citizens. In particular, there are opportunities for students to gain recognition in vocational education and training.

| VISUAL ARTS   |  | Unit Value      | ATAR Category |
|---|--|-----------------|---------------|
| Board Developed Course  |  | 2               | A             |
| Prerequisites: Nil  |  | Exclusions: Nil |               |
| Cost: \$80 per year with possible additional expenses for the production of the body of work.   |  |                 |               |
| <b>Course Description:</b><br>Visual Arts involves students in the practices of artmaking, art criticism and art history. Students develop their own artworks culminating in a ‘body of work’ in the HSC course that demonstrates their ability to resolve a conceptually strong work. Students critically investigate works, critics, historians and artists from Australia as well as other cultures, traditions and times. The Year 11 Course is broad, while the HSC Course provides for deeper, increasingly more independent investigations. The literacy and analytical demands of this course are high. It is well suited to students who will work hard in class, ask questions and engage in regular revision to ensure they are up to date with coursework. Students who enjoy working autonomously are creative and have competent time-management skills would suit this course.   |  |                 |               |
| <b>Main Topics Covered:</b><br><div><div><u>Year 11 Course:</u><ul style="list-style-type: none"><li>- The nature of practice in artmaking, art criticism and art history through different investigation</li><li>- The role and function of artists’ artwork, the world and audiences in the artworld</li><li>- The frames and how students might develop their own informed points of view</li><li>- How students may develop meaning and focus and interest in their work</li><li>- Building understandings over time through various investigations and working in different expressive forms.</li></ul></div><div><u>Year 12 Course:</u><ul style="list-style-type: none"><li>- How students may develop their own informed points of view in increasingly more independent ways using the frames</li><li>- How students may develop their own practice of artmaking, art criticism and art history applied to selected areas of interest</li><li>- How students may learn about the relationships between artist, artwork, world and audience within the artworld</li><li>- How students may further develop meaning and focus in their work.</li></ul></div></div> |  |                 |               |
| <b>Particular Course Requirements:</b><br>Year 12: students must submit a body of work, worth 50 marks, and sit for a written examination, worth 50 marks, at the Higher School Certificate.  |  |                 |               |
| <b>External Assessment:</b><br>HSC Course:<br>Practical Body of Work 50%<br>HSC examination – 1 hour 30 minutes written paper (50%)   |  |                 |               |

### Employment / University Opportunities:

Visual Arts students develop their skills in communication, creative thinking, problem solving, writing and analysis. They are given opportunities to work autonomously and in collaboration. These skills are valuable and build a solid foundation for students moving into the work force or into higher education. Specific links can be made between Visual Arts and the following career paths: Art Critic, Art historian, Gallery Curator, Practicing Artist, Architecture, Advertising, Design, Art Directing, Graphics and Media Studies, Animation, Film Making, Game Design, Photography, Printing, Teaching, Town Planning and many more.

| NUMERACY  |                 | Unit Value | ATAR Category |

### Employment / University Opportunities:

Fitness Industry, Outdoor Recreation, First Aid and Coaching opportunities.

Life Skills courses provide an alternative HSC for students with special learning needs. They are not examined externally and do not contribute to an ATAR.

Each course is studied at 2 unit level in Year 11 and in Year 12. Students, in consultation with the Head Teacher Special Education, will be able to undertake the following program of study for the awarding of a Life Skills HSC. NESA has developed Life Skills courses for a range of subjects.

Life Skills HSC subjects offered at Chatswood High School are:

- English Life Skills
- Mathematics Life Skills
- Science Life Skills
- Personal Development Health and Physical Education Life Skills
- Human Society and its Environment Life Skills.
  - This includes aspects of Aboriginal Studies, Citizenship and Society Studies, Geography, History and Legal Studies.
- Creative Arts Life Skills
  - This includes Music and Visual Arts.
- Technology Life Skills
  - This includes aspects of Food technology and Industrial Technology.

Courses focus on generalising knowledge, understanding, skills, values and attitudes across a range of post school destinations. The structure of each course is designed to provide a broad and balanced approach to meet individual student needs in preparation for participation into community life.

At Chatswood High School it is possible for students to make up their units with a combination of life skills and mainstream subjects.

Life Skills courses are developed on an individual basis. Planning is a collaborative process where an Individual Transition Plan is developed by parents, student, and the school's Learning Support Team.

### Post-School Options

These may involve employment, community involvement, further study or, a combination of all three. Prior to leaving school, relationships are established with post-school service providers and assessments are offered through the NDIS School Leaver Employment Support (SLES) Functional Assessment for School Leavers, to determine appropriate levels of support for individual students.

Education

## VOCATIONAL EDUCATION AND TRAINING PUBLIC SCHOOLS NSW, MACQUARIE PARK RTO 90222

### Vocational Education and Training (VET) Courses

Public Schools NSW, Macquarie Park RTO 90222 is accredited as a Registered Training Organisation (RTO) to deliver and assess VET qualifications to secondary students.

By enrolling in a VET qualification in NSW Public Schools Macquarie Park RTO 90222, you are choosing to participate in a program of study that will give you the best possible direction towards a nationally recognised qualification. To receive the AQF VET qualification Certificate I, II or III, students must meet the assessment requirements of the Industry Training Package (<http://training.gov.au>).

Students will also be expected to complete all requirements relevant to the HSC and adhere to the requirements of NESA. When a student achieves a unit of competency it is signed off by a qualified assessor. To achieve the qualification students must be deemed competent in all units of competency.

Vocational Education and Training (VET) courses are offered as part of the Higher School Certificate (HSC) or Record of School Achievement (RoSA). VET courses are designed to deliver workplace-specific skills and knowledge and cover a wide range of careers and industries. VET courses for secondary students are developed by the NSW Educational Standards Authority (NESA) and are based on National Training packages.

VET courses allow students to gain both HSC or RoSA qualifications and a national qualification or a statement of attainment recognised throughout Australia as part of the Australian Qualification Framework (AQF). These qualifications are widely recognised by industry, employers and tertiary training providers and will assist students to move to various education and training sectors and employment.

There are two types of Stage 6 VET courses available to students:

1. **Board Developed VET courses** count towards the HSC or RoSA and are classified as Category B subjects. These courses have an optional HSC examination. Students wishing to include a VET course in the ATAR calculation must sit the HSC examination after they have completed a minimum of 4 x Preliminary and/or HSC units. ONLY ONE Board Developed VET course may contribute to the calculation of the Australian Tertiary Admission Rank (ATAR).

Board Developed VET courses have specified workplace requirement and include a minimum of 70 hours of **mandatory** industry specific **work placement** that may include up to 50% simulated workplace hours at school as specified by NESA.

2. **Board Endorsed VET Courses** count towards the HSC or RoSA but do not have an HSC examination and therefore do not count in the calculations of the ATAR. Many Board Endorsed VET Courses have mandatory industry specific work placement as specified by NESA.

Assessment in all VET courses is competency based. The student is assessed on what they can do (the skills) and what they know (the knowledge) that will equip them in the workplace. Students who have successfully achieved competency will have the skills and knowledge to complete workplace activities in a range of different situations and environments, to an industry standard of performance expected in the workplace.

Competency-based assessment materials are designed to ensure each learner has achieved all the outcomes (skills and knowledge) to the level of the qualification. Competency-based training is based on performance standards that have been set by industry.

Students will receive documentation showing any competencies achieved for the VET course undertaken (Transcript).

Due to the specific requirements of a VET course it is recommended students speak to the VET Coordinator, VET Teacher or Careers Adviser before choosing the course to ensure they are fully aware of the requirements and that the course is suitable for their individual needs, knowledge and skills.

General VET Course Information to Schools 2023

Chatswood High School will offer the following Vocational Education and Training subject in 2023:

- Financial Services
- Entertainment Industry
- Entertainment Industry – Specialisation (Year 12 only)

Vocational Education and Training courses provide students with the opportunity to gain:

- an industry-recognised national vocational qualifications under the Australian Qualifications Framework (AQF)
- a NSW Higher School Certificate (HSC)
- an ATAR. The examination mark from **one** Industry Curriculum Framework VET course may be included in the calculation of a student's ATAR.
- a range of technical, personal and organisational skills highly valued by employers .

### **School based assessment**

VET courses are competency based. This requires students to develop skills and knowledge and then demonstrate these to a qualified assessor. When demonstrated to an industry standard, the student is then deemed 'competent'.

Students complete assessment tasks known as cluster tasks, to assess their level of competence. Cluster tasks contain both written and practical work.

### **HSC examination (optional)**

The HSC examination for a VET course will involve a written examination made up of multiple choice, short answers and extended responses. This written examination is optional, but must be undertaken by any student wishing to achieve an ATAR.

This examination is independent of the competency-based assessment and has no impact on a student receiving AQF qualifications.

### **Work placement**

To be eligible for an HSC in a VET course, students must complete a mandatory work placement in both the Year 11 and Year 12 courses. A total of 70 hours for a 240 hour 2 unit course must be completed in the industry relevant to their VET course by the conclusion of Term 3 of their HSC year.

Students who can provide evidence of recent or relevant experience in the industry relevant to their course can apply for Recognition of Prior Learning (RPL). These students should seek the advice of their VET teacher or VET Coordinator.

Students who do not attend work placement due to illness or misadventure must notify the school and produce appropriate evidence on return to school. Non-completion of work placement is grounds for withholding the course and students may be issued an 'N' determination.

## VET COURSES AND STUDENTS WITH SPECIAL EDUCATION NEEDS

VET courses can be taken by any students including those with special education needs. Successful participation in VET courses for students with special education needs requires:

- ongoing partnerships between the schools and students, parents, teachers, employers and others in the community
- collaborative curriculum planning
- appropriate learning and assessment strategies
- consultation on whether the student needs support to undertake work placement.

### Assessment

All students undertaking VET courses, including students with special education needs, *are subject to the same assessment requirements.*

Reasonable adjustments may be made to assist students to develop their skills and knowledge to an industry standard and achieve competency. Where adjustments to delivery and assessment are made, the industry competency standards need to be met.

OR

Adjustments to delivery and assessment may be made to assist students to develop their skills and knowledge to an industry standard and achieve competency. However, where adjustments are made, the industry competency standards need to be met.

### Work placement

All students, including students with special education needs, must complete mandatory work placement requirements.

This should be taken into consideration *before* choosing a VET course.

## REFUND POLICY

If a student decides to leave the course, they must contact the School Office for details of the refund policy.

The school VET coordinator has more information on VET courses.

## EXTERNAL COURSE INFORMATION

Students interested in completing a Year 11 and Year 12 course through an external course provider will need to complete the [External Studies Application Form](#).

Students should be aware of the following:

1. they will be required to complete 12 units at CHS until the end of Term 1
2. completing an external course may require a student to miss timetabled CHS lessons, and **it is the responsibility of the individual student to identify worked missed and complete all that is required to maintain currency.**

## TAFE BASED VET COURSES (TVET)

Consider carefully any TVET selection you make. If you select a TVET course for the wrong reason you may not be successful in completing the course. This may then put the successful completion of Year 11 in danger. Consult the Careers Adviser prior to making your application.

Students need to complete the [External Studies Application Form](#) for CHS and discuss this with the Careers Adviser during the subject selection interview process. Students will have to obtain the TVET Course Information Sheet from the Careers Adviser, together with the relevant TVET application form. All TAFE delivered courses require the completion of an application form. Ensure that a sufficient number of units are chosen at school in case the TVET application is unsuccessful.

The majority of TVET classes are held on TUESDAY afternoons each week. Classes usually start from 2pm onwards and finish by 6pm. Occasionally other days and/or times are organised by TAFE. As courses run in and out of school time, some students will miss some classes at school and this will be required to be completed in student's own time. Be aware of this and consider whether you are willing to miss these classes.

If students miss a TAFE lesson for any reason, explanation and documentation needs to be given to the Careers Adviser at Chatswood High School on return to school.

Students attending TVET are responsible for payment of bus or train fares to and from the TAFE college. School transport passes may not be used. ***It is important to note that if a student withdraws from a course after acceptance, a fee may apply.***

TAFE is an adult learning environment in which all TAFE attendance and assessment requirements must be met. Before accepting an application TAFE requires the school to make a recommendation as to the student's suitability. This recommendation is based on the student's work effort, behaviour and attendance.

Remember, if you select a TVET course which you do not wish to continue in Year 12, and you wish to drop a school based course, you may be limiting your options for an ATAR or in some cases your HSC.

Entry to most courses is competitive. There are no TAFE fees (unless a student withdraws after the commencement date); however, students must provide their own materials. Course availability is subject to demand. There are 2 types of courses, ATAR and non-ATAR. School based Traineeships and Apprenticeships may be available for some courses.

**For a full list of courses and their locations, see the Careers Adviser.**

## SATURDAY SCHOOL OF COMMUNITY LANGUAGES

### Study your background community language at the Saturday School of Community Languages!

The Saturday School of Community Languages (SSCL) is a Department of Education and Communities secondary school that offers language courses to students wishing to study their background community language if it is not available for study at their day school.

There are fourteen SSCL Centres, twelve based at high schools in the Sydney metropolitan area and one each in Wollongong and Newcastle.

Courses are offered for the Record of School Achievement and the Higher School Certificate in twenty five languages.

For more information, please visit the Saturday School of Community Languages website <https://saturdaycl-h.schools.nsw.gov.au/>.

If you wish to study your background community language, please obtain initial advice from your school.

NSW School of Languages is a NSW Department of Education secondary distance education school offering courses in 12 languages to students in Years 9-12, and is located in Petersham.

If a student wishes to continue a language that is no longer available at their school, or they wish to start a new language that is not offered, study through NSW School of Languages may be an option. To be eligible for a course, students are required to meet all of the criteria at the entry point to that course.

It is self-evident that any course of study requires effort on the part of the learner. Students are expected to attend phone lessons, send in work on a weekly basis and/or complete the units in their online Moodle course, as advised by their teacher. They are also required to attend NSW School of Languages for designated Lesson Days and for formal assessments.

More information can be found on the website <https://nswschoolang.schools.nsw.gov.au/>

Ms Reato (Teacher-Librarian) is Chatswood High School's supervisor of Distance Education and can be contacted at school for further information.

### SUBJECT SELECTION POLICY AND PROCEDURES

#### Preamble:

The selection of subjects appropriate to a student's interests, skills and abilities is fundamental to success at school. At Chatswood High School, students in Year 10 make choices regarding the subjects they will study for the HSC. The process of selection is aided by a variety of key school personnel including:

- the Year Adviser
- the Careers Adviser
- Curriculum Head Teachers
- The relevant Deputy Principal

#### Procedures:

Subject selection for Year 10 will take place following the parent information evening. Students will be interviewed individually by a member of the Subject Selection team. They then submit their subject choices through the CHS subject selection web address, using Edval Choice software.

There is also an External Studies application form for study of a TAFE course, a Saturday School of Community Languages course or a NSW School of Languages course. This form should be handed in at the time of the subject choice interview. If it is agreed that this is a suitable option, students need to obtain the appropriate application form from the following:

#### Establishment of Classes

Generally, a class will operate if it has 12 members or more. In exceptional circumstances, the Principal may decide to allow a class of fewer students to operate in the interests of maintaining a diverse curriculum. Once numbers have been entered onto the timetable program, the Principal will determine which classes will operate and which will not. Except in unusual circumstances, decisions not to run a course will not be reversed.

Students will be interviewed if a particular course does not run and they will be required to make another selection. The Careers Adviser may again be involved with students at this point. Students will already have indicated some reserve preferences on their subject selection submissions.

Whilst every effort will be made to ensure a minimum of issues for students, it is not possible to give all students their preferences. Any students who have a clash of courses will be interviewed, the clashes resolved and appropriate alternative choices made.

At this point, subject selections are firm. Students will not be permitted to change classes, except under exceptional circumstances until Week 3 of the new year in consultation with the Deputy Principal.

#### Change of Course

There will be occasions when students wish to change subjects. Year 11 will have one opportunity to change courses. This will be early in Term 1 (approximately Week 3). The process will be advertised to students at Assembly and on their year group Google Classroom. Forms will be available from the Front Office or Deputy Principal. Any course changes will be done on a first in, best-dressed basis.

Students should undertake the following steps:

- consult the Careers Adviser who will assess whether the changes meet the requirements of NESA and tertiary institutions. If these requirements are met, the Careers Adviser will advise the continuation of the process.
- discuss the proposed changes with the teacher and Head Teacher of all Faculties involved.
- get approval for the changes in writing from parents or carers on the *Change of Subject* form.

Students cannot change until all relevant sections of the *Change of Subject* form have been completed and registered with the Deputy Principal who will make the required changes to the school records and notify NESA. Changes do not occur until the form has been received by the Deputy Principal.

Changes cannot occur after the first few weeks of Year 11 due to assessment requirements as well as mandatory hours of study as required for successful completion of the Year 11 course by NESA.

### Fees

Some courses attract fees. Fees (if applicable) are outlined with each course and are for **each year** of the course (i.e. the fee will be charged in **both** year 11 and year 12) unless otherwise indicated.

## HONESTY AND INTEGRITY IN THE HSC

### All My Own Work

To be eligible for a HSC all students must complete the *HSC: All My Own Work* program or its equivalent. The program is designed to help HSC students to follow the principles and practices of good scholarship. This includes understanding and valuing ethical practices when locating and using information as part of their HSC studies.

The program will be delivered in Semester 2 of Year 10. All modules must be completed to a satisfactory level before a student is deemed to have completed the program.

## INTENTION TO ENGAGE IN EXTERNAL STUDIES FORM

Use this form if you intend to apply for a TAFE, Saturday School or NSW School of Languages course. This is the Chatswood High School form. You need to have this form with you at the time of your interview.

Students undertaking any external study must take 12 units of timetabled classes at school until the end of Term 1. This provides you with an “insurance policy” in case you don’t continue with your external study.

Once you have completed your subject interview at school and permission has been given for you to apply for an external course, you will need to see the following to obtain an application:

TAFE  
Saturday School of Community Languages  
NSW School of Languages

Ms Stacey, Careers Adviser  
Ms Zhang, Head Teacher Languages  
Ms Reato, Librarian, HT Wellbeing

**It is your responsibility to see these staff members to obtain an application form, to complete the form, and to return it as quickly as possible.**

Students in year 11 who undertake external studies **must have 12 units of courses at school until the end of Term 1.**  
In order to discontinue a course at school they must prove they are successful in their external course.

Name: \_\_\_\_\_

## TAFE VET COURSE

| Course | TAFE at which you will be studying | Number of Units |
|--------|------------------------------------|-----------------|
|        |                                    |                 |

## SATURDAY SCHOOL OF COMMUNITY LANGUAGES COURSE

| Course | Saturday School at which you will study | Number of Units |
|--------|---|-----------------|
|        |   |                 |

## NSW SCHOOL OF LANGUAGES COURSE

| Course | Number of Units |
|--------|-----------------|
|        |                 |

## Complete the parent authorisation (ALL APPLICATIONS)

Parent / Carer Authorisation:

I understand that my child is applying to study a course or courses externally. I understand that the policy of Chatswood High School is for my child to study a minimum of 12 units at Chatswood High School in addition to the external study. If they wish to drop a course they may do so at the end of Term 1 on the proviso they provide evidence to the Deputy Principal that they are successful in the external course.
